

## Functionalised N-heterocyclic Carbene Complexes (Hardback)

Filesize: 2.86 MB

### ***Reviews***

*Good e book and valuable one. Better then never, though i am quite late in start reading this one. You are going to like how the article writer publish this publication.*

***(Malcolm Block)***

## FUNCTIONALISED N-HETEROCYCLIC CARBENE COMPLEXES (HARDBACK)

John Wiley and Sons Ltd, United States, 2010. Hardback. Book Condition: New. 250 x 174 mm. Language: English . Brand New Book. N-heterocyclic carbenes (NHCs) have found increasing use as reagents for a range of organic transformations and in asymmetric organocatalysis. The performance of these molecules can be improved and tuned by functionalisation. Functionalised carbenes can anchor free carbenes to the metal site, introduce hemilability, provide a means to immobilise transition metal carbene catalysts, introduce chirality, provide a chelate ligand or bridge two metal centres. NHC can be attached to carbohydrates and campher, derived from amino acids and purines, they can be used as organocatalysts mimicking vitamin B1 or as weak solvent donors in lanthanide chemistry. Functionalised N-Heterocyclic Carbene Complexes describes major trends in functionalised NHC ligands, aiming to assist readers in their attempts to develop and apply their own functionalised carbenes. After an introduction to the chemistry and behaviour of NHC, the book gives a detailed description of functionalised carbenes and their complexes according to a range of functional groups, each with a discussion of the synthetic route, structure, stability and performance. Functionalised N-Heterocyclic Carbene Complexes is an essential guide to fine-tuning this important class of compounds for practitioners, researchers and advanced students working in synthetic organometallic and organic chemistry and catalysis.
