Thus in the successive classes, units, tens, hundreds, thousands, the ten contains ten units; the hundred, ten tens; the thousand, ten hundreds. The denominations of Federal money are based on decimal classification and consequently constitute a perfect system of currency. Arithmetic Disciplines Chiefly the Reasoning Faculty.--The operations of arithmetic demand steady and persistent efforts of the reasoning faculty. The processes by which most of its problems are solved are faultless examples of deductive reasoning. The general propositions from which the deductions are made are either axioms or derived from axioms, and are, therefore, absolute certainties. All the steps from the premises to the conclusions are likewise free from possible errors, if correctly taken; and the conclusion is, in such case, beyond all question. Thus the young student often finds his first examples of perfect reasoning in the pages of his arithmetic. English Grammar:...
