By United States General Land Office

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 edition. Excerpt: . the entire tract is estimated by going through it a sufficient number of times to see all the timber. To work to the best advantage, there should be two men--one to keep a straight line with the compass and to pace the distances and the other to estimate and tally the trees. This method is especially desirable in case of surveyed land, where the estimate should be made by forties. In ordinary practice it is usual to cross each forty four times, tallying by the strip method already described. It is better, however, to go through each block (in the case of surveyed land a quarter section) on lines not over 100 yards apart, making a halt at every 100 yards, and estimating the 100-yard square around this station. The figures for each square should be kept separate, and the location on the...
