

# The modern preceptor or a general course of education Volume 1 containing introductory treatises on language, arithmetic, bookkeeping, algebra, . painting, c., agriculture, geology, moral p

By John Dougall

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 138 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1810 Excerpt: . . . shillings eight pence and two farthings, for instance, it is customary to write it in this way 6sh. 8d, because four farthings forming one penny, two farthings must be one half of a penny: and five shillings and nine-pence three-farthings would be written 5sh. 9id. In this mode of representing a fraction the number under the line is termed the Denominator, because it denotes the number of parts into which the unit or integer is divided; and the number above the line is termed the Numerator, because it shows how many of such parts are contained in the given fraction. In working with fractions it often happens that we obtain fractional numbers of which the numerator is greater than the denominator, as, or five quarters of a yard: this however is not properly a fraction, but rather a mode of representing a number composed of an integer...
